

Improved ICH detection, shorter stays, and added reimbursement with Rapid ICH + Hyperdensity

Analysis of 36 months of data pre- and post- rapid installation at Corewell Health's Dearborn Campus.

Pre- vs post RapidAI implementation

THE TAKEAWAY

Rapid helped Corewell Dearborn elevate its hemorrhagic program through ICH detection and quantification, aiding in a reduced LOS while unlocking additional reimbursement of ~\$500 per scan.

Comprehensive benefits

Clinical

Identifies more patients and provides critical information quickly

Operational

Enhances workflow, yielding faster transfer and treatment decision making

Financial

Drives procedures, shortens LOS, and provides positive reimbursement (~\$500 confirmed payment on Hyperdensity)
